

PRO700 TECHTRACKER WIRE AND VALVE LOCATOR

RESULTS MATTER

- Headset or External Speaker Response
- Locates Wire Path and Valves
- Long 27 inch metal wand
- Locates Breaks and Large Nicks
- 'D' Cell Batteries
- Hardshell Custom Case

COUNT ON IT

The **Pro700 TechTracker** adds features not seen on valve locators, including an extra long metal wand for easy tracking, the option of using an external speaker instead of a headset when listening to signal, and D batteries for power. Old antiquated 'PVC pipes and tackle boxes' are no match for the power and sophistication of the Pro700.

PRODUCT FEATURES

- Receiver has SPEAKER
- Pistol style receiver is extended for ease of locating
- Receiver has increased AC filtration
- Simple power check of transmitter output
- Rugged and compact carrying case
- Extra long metal wand
- Custom hard shell case
